WORK EXPERIENCE

UI developer, Pitney Bowes – April 2019 to present – Noida, Uttar Pradesh

Pitney Bowes is a global technology company most known for its mailing equipment and services, and e-commerce.

- Implemented a number of key functionalities in Spectrum Spatial Analyst – a web mapping application.
- Developed several reusable Angular directives and components keeping unit testing in mind.
- Fixed bugs in modules developed by other team members and contributed to the successful delivery of the product in time.

UI developer, Publicis.Sapient – March 2018 to March 2019 – Noida, Uttar Pradesh

Publicis.Sapient is a Consulting as well as marketing company providing various services to its clients.

- Helped the client in transforming their website built with HTML + CSS + JS (jQuery) to one built on a CMS (Adobe Experience Manager 6.2).
- Helped in the implementation of the analytics on the website using DTM (Dynamic Tag Management) which is a part of the Adobe Marketing Cloud for tracking the visitors.
- Worked on the creation of a Single Page Application (SPA) based on Angular 4 - a dashboard for tracking the assets of the users.
- Created forms using template-driven and reactive approaches to engage the users, validated user actions on the client-side and provided responsive feedback.

Full stack developer, Accenture – October 2014 to February 2018 – Bengaluru, Karnataka

Accenture is a leading global professional services company, providing a broad range of services and solutions in strategy, consulting, digital, technology and operations.

- Developed a major portion of claims processing section for an insurance giant.
- Worked on the development of a hybrid mobile application (for iOS and Android) based on Ionic 1 that helped with mindfulness. Was responsible for the management of downloaded files along with other features
- Developed a number of REST services in Node.js using the Express framework that were consumed by a collection of applications on various platforms.
- Created a basic logger utility in Node.js for keeping track of the application status

SIDE PROJECTS

UnitCon: This is a unit conversion application for Windows Phone developed on C#.

keyboardDictionary: A web app built using Vanilla JavaScript and a dictionary API that shows the meaning of random words starting with the key pressed on a keyboard.

Reminder: An application built with Angular that can be used to send messages to various platforms.
